SCOPE OF SERVICES

Year 5 Valley and 70th Wetland Mitigation Monitoring and Reporting

The following items describe the Scope of Services that David Evans and Associates, inc. (DEA) will perform for the City of Fife (CLIENT) under this Agreement. DEA will conduct Year 5 Wetland Mitigation Monitoring and Reporting for the 70th Avenue East and Valley Avenue East Improvement Project (Project) as required by the U.S. Army Corps of Engineers (Corps) and Washington State Department of Ecology (Ecology). This scope of services addresses Year 5 permit requirements as stipulated by both the Corps (Reference No. 200600706) and Ecology (WQ Cert. Order No. 4419).

Specific tasks included in this scope of services are as follows: (A) Field Work, (B) Year 5 Monitoring Report (C) Memorandum, (D) Survey, and (E) Project Management.

(A) Field Work. DEA will monitor the mitigation site to document Year 5 conditions as they relate to achievement of the approved performance standards. Year 5 performance measures are as follows:

- Creation of 1.83-acre of wetland area;
- Inundation or saturation to the surface for greater than 12.5 percent or 20 consecutive days during the growing season;
- 70 percent survival of woody species as measured in randomly located transects in the wetland area;
- 50 percent coverage of emergent species within emergent areas as measured in targeted transects;
- 50 percent total cover of native woody species as measured in randomly located transects in the buffer area;
- Percent cover of non-native invasive species will be less than 15 percent;
- Habitat features present and functional;
- Year 5 photo documentation at established photo points.
- Maintenance occurring as required/needed. Maintenance items include watering, weeds, trash, fence, and NGPA signage.

DEA proposes to conduct two site visits early in the season to document hydrology and determine what maintenance actions should be undertaken during the summer of Year 5. Two additional site visits will be conducted mid/late summer to measure percent survival, percent cover, hydrology, species diversity, delineate wetland edges and ordinary high water mark (OHWM), and photo documentation.

Documentation of 1.83-acre of wetland creation requires delineation of the mitigation site. DEA will delineate wetland edges and OHWM for use in calculating

wetland acreage. DEA will document soil, hydrology, and plant cover at a minimum of four data plots. The wetland creation area will also be rated per Ecology criteria.

- (B) **Report.** DEA will prepare a Year 5 monitoring report that documents the results of Task A. The report will be submitted to both the Corps and Ecology. An additional copy will be provided to the City of Fife in both electronic and hard copy formats for purposes of record management.
- (C) **Memorandum.** DEA will prepare a memorandum to accompany the Year 5 monitoring report to request future reporting be suspended. Preparation of this memorandum assumes all success standards are met during Year 5.
- (D) **Survey.** DEA will survey wetland delineation and OHWM flags (~100 total), 4 piezometers, 10 transects (40 laths), and 4 data plot. DEA will add existing data as available, to include topography, parcel lines, trail, and stormwater pond. The purpose of the field survey is to document the amount of wetland creation acreage and monitoring efforts. DEA will prepare an exhibit with this data that will be included in the Year 5 monitoring report (**Task B**) and memorandum (**Task C**).
- (E) **Project Management.** Project management includes actions associated with project set-up, invoicing, QA/QC measures, file management, budget tracking, and project close-out. It is assumed the project duration will be no more than four months from the date of notice-to-proceed.

Deliverables: DEA will provide the following deliverables:

1. Year 5 Monitoring Report (3 hardcopies and electronic pdf)

Schedule: Following issuance of a notice-to-proceed by CLIENT, DEA will diligently proceed with services described herein until complete. All deliverable will be provided to the CLIENT within three months of receiving a notice-to-proceed. This schedule can be accelerated at the CLIENTS request. DEA will not be responsible for delays caused by factors beyond DEA's control or which could not have been foreseen at the time this Authorization was executed. This is particularly true where the work requires a work product from the CLIENT, their agent, or project designer/engineer.
