**PROJECT TRACKING AND FUNDING**

NOTE: Sponsors may request funding for any single phase of the project, but requests for multiple phases is limited to preliminary engineering plus the subsequent phase necessary. For instance, requests for multiple phases are limited to the combination of (1) preliminary engineering and right-of-way or (2) preliminary engineering and construction (no right-of-way and construction requests will be considered).

*Required Match:* A minimum of 13.5% of local matching funds is required for PSRC’s FHWA funding. The following formula may be used to calculate the projects match:

To calculate the amount of matching funds, divide the federal funds requested by .865 and subtract the federal funds from this amount.

Example: Federal funds requested = \$100,000

$$\begin{aligned} \$100,000 / .865 &= \$115,607 \\ \$115,607 - \$100,000 &= \$15,607 \text{ local match required} \end{aligned}$$

Please note: The combination of the requested PSRC funds plus all other funding must be adequate to fully fund that phase. Requests that do not result in a phase being fully funded cannot be approved into the regional TIP and therefore will be considered ineligible for PSRC funding.

**10. Grant Funds Requested**

<b>Phase (e.g., Planning Study/Project,, Preliminary Engineering, Right of Way, Construction, Other)</b>	<b>Estimated Obligation Date (year only)</b>	<b>Federal Funds Requested</b>

If construction funds are being requested, please describe any ROW needs for the project, including the number of parcels needed, whether property owners are expected to cooperate (and your agency’s experience with condemnation and/or whether it is willing to go to condemnation if needed).

The City Council has approved funding for PS&E for the project and the Design Phase has been advertised and the consultant selected. Anticipated completion date for the Design Phase is November 2014.

ROW acquisition would not be required for this project. South Meridian corridor is built-out and the overlay placement and ramp construction will occur within the limits of the existing ROW.

17a. Will other secured or reasonably secured funding benefits be missed if the project remains unfunded in 2015, 2016 or 2017?

Yes **XX** No \_\_\_\_\_ (Include information about other funding benefits.)

Please explain:

LIFT Grant funds will be utilized for the Local Match. LIFT funding only applies to projects within the City’s designated “Revenue Development Area (RDA)” which the South Meridian Corridor is included. Depending on the magnitude of projects/investments completed in the RDA, LIFT funding could possibly be reduced. However, since the City was awarded the LIFT Grant in 2009, the City has qualified to receive the full funding amount each year.

18. Pierce County Regional Growth Centers Hierarchy and Connecting Corridors criteria: Is the project located in (1-3) or serving (4-6) any of the following? (Please check all that apply).

1. Metropolitan Center (scores 1 point)		4. Corridor Supporting one (1) or more Regional Manufacturing/Industrial or Candidate Center (scores 2 point)	
2. Regional or Candidate Growth Center Manufacturing/Industrial or Candidate Center (scores 2 points)		5. Corridor Supporting one (1) or more Centers (scores 1 point)	X
3. Countywide Center or Locally Identified Center (see approved PCRC Map) (scores 1 point)		6. Corridor Supporting two (2) or more Centers (scores 1 point)	X

Local city and town centers provide local job, service, cultural, and housing areas for their communities. They serve as focal points where people come together for a variety of activities, including shopping and recreation. These central places must be identified in local comprehensive plans, or should be advancing towards that goal. These areas are to become priority areas for future investments and growth at the local level.

List and describe centers and attach map.

- 1. Downtown Puyallup Regional Growth Center
- 2. South Hill Regional Growth Center.

The South Meridian Overlay Project is the primary corridor linking the Downtown Puyallup Regional Growth Center and the South Hill Regional Growth Center. (See Attachment 5).

**23. Describe how the project has the potential to reduce emissions?**

**Guidance:** The application process will walk project sponsors through specific questions designed to determine the potential emissions reductions of their project. For example, projects involving fuel or vehicle conversions will be asked to provide information on the total number of vehicles affected, the current fuel and vehicle usage conditions, as well as the conditions after the project is implemented. Projects expected to result in an increase in transit usage will be asked to provide information on the current transit ridership and transit routes affected, as well as the specifics of the project – i.e., how will the individual project encourage or promote new transit riders. Projects providing new or more frequent/expanded transit service would be expected to result in a higher level of new transit riders than projects providing improvements in existing transit travel times or enhanced amenities to existing service. Projects resulting in improvements in traffic flow will be asked to provide information on the current travel conditions, amount of idling, number of trucks using the route, etc. As mentioned above, the magnitude of the project and the timing of the anticipated benefits will play a role in the final score, and all projects will be evaluated against each other.

Please explain:

**High:** A project will rate high if:

- It will substantially reduce emissions of greenhouse gases and other air pollutants, or will substantially reduce fine particulates from diesel exhaust; and
- The air quality benefits will occur by 2020.

**Medium:** A project will rate medium if:

- It will moderately reduce emissions of greenhouse gases and other air pollutants, or will moderately reduce fine particulates from diesel exhaust (for example, a project that reduces VMT by shortening a vehicle trip, rather than eliminating a vehicle trip); and
- The air quality benefits will occur by 2025.

**Low:** A project will rate low if:

- It results in a low amount of emissions reductions; and
- The air quality benefits will occur after 2025.

Typical improvements would include replacing spalled or malfunctioning joints; substantial pavement stabilization prior to resurfacing; grinding/grooving of rigid pavements; replacing deteriorated materials; reworking or strengthening bases or subbases, and adding underdrains.</p>	<p><b>07 = Resurfacing</b>          Placement of additional surface material over the existing roadway to improve serviceability or to provide additional strength. There may be some upgrading of unsafe features and other incidental work in conjunction with resurfacing. Where surfacing is constructed by separate project as a final stage of construction, the type of improvement should be the same as that preceding stage—new route, relocation, reconstruction, minor widening, etc.</p>

- High:** A high scoring project would demonstrate the following characteristics:
- Provides clear benefit to a center or centers by expanding the person and goods carrying capacity of routes leading towards the center(s).
  - Demonstrates that it helps a center(s) meet its development goals (and can reference these goals).
  - Improves access to the center(s) for multiple modes, including nonmotorized and transit.
- Medium:** A medium scoring project would demonstrate the following characteristics:
- Primarily benefits the development along the corridor rather than a center.
  - Benefits to a center’s development goals are not described in a comprehensive plan.
  - Improves access to a center, but only for a few modes.
- Low:** A low scoring project would demonstrate the following characteristics:
- Has very limited benefits to a center, with the benefits not described in a comprehensive plan.
  - Limited access improvements for only one mode.

- High:** A high scoring project would demonstrate the following characteristics:
- Serves multiple user groups, including those without full-time access to cars, those identified in the President’s Order for Environmental Justice, and/or areas experiencing high levels of unemployment or chronic underemployment.
  - Adjacent to dense, mixed-use areas that are likely to generate significant use of the project.
- Medium:** A medium scoring project would demonstrate the following characteristics:
- Serves a moderate number and variety of users.
  - Adjacent land uses are low-density, and therefore, likely to generate limited use.

- High:** A high scoring project would demonstrate the following characteristics:
- Improves a corridor in logical segments, preventing the creation of missing links or gaps, thereby improving access to a center or centers.
  - Creates a new intermodal connection that provides significant system-wide performance benefits.
  - Address critical gaps or barriers in the development of a corridor, creating greater efficiency or reliability in accessing a center.
  - Removes a bottleneck that improves the overall system performance and creates improved access to a center.
  - Provides a long-term solution for meeting projected travel demand for people and/or goods to a center, considering environmental issues, land-use strategies, transportation efficiency, and health impacts.

- Medium:** A medium scoring project would demonstrate the following characteristics:
- Improves a corridor in logical segments, but provides limited improvement in accessing a center.
  - Creates a new intermodal connection that provides moderate system-wide performance benefits.
  - Addresses important, but not critical, gaps or barriers in the development of a corridor and has limited improvements in efficiency or reliability in accessing a center.
  - Provides limited relief to a bottleneck with limited improvement to overall system performance.
  - Provides a short-term solution for meeting projected travel demand for people and/or goods, considering environmental issues, land-use strategies, transportation efficiency, and health impacts.

- Low:** A low scoring project would demonstrate the following characteristics:
- Does not improve a corridor in logical segments and does not provide for improved access to a center.
  - Does not create new intermodal connections.
  - Addresses marginal gaps or barriers in the development of a corridor and has very limited improvements in efficiency or reliability in accessing a center.
  - Has no perceptible improvement to a bottleneck or to overall system performance.
  - Does not address long-term projected travel demand.
  - Serves areas outside the Urban Growth Area.
